Precipitation probability							
50%	50%	60%	70%	70%	60%	30%	30%

Forecast for Sunday 16 Jun 2024

Weather: Showers probably more frequent and heavier for a time through the morning and into the early afternoon, still heavy and thundery in places. However, there will also be sunny spells in-between. The showers will tend to weaken and become more isolated towards the evening, with some longer clearer spells developing.

Chance of cloud-free hill tops above 600m: 60% improving to 90% or more.

Low cloud and visibility: Cloud occasionally around 600m in the morning, especially in heavier showers. However, bases lifting largely above summits into the afternoon, although some brief reductions possible in any heavier showers. Generally very good visibility outside showers, with brief reductions in showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Chance of thundery showers, giving low lightning risk. High UV levels will give a risk of sunburn in longer sunny spells.

Recent rainfall: measured at Neuadd: altitude 353m
